

AKVIS Chameleon 11.0: Creating Composite Images & Collages!

November 6, 2020 – AKVIS announces the major update of AKVIS Chameleon, software for making collages and composite pictures. Version 11.0 includes new adjustment settings for the source images and the resulting collage, new Transform options, the Swap Images button, and many other changes.

[AKVIS Chameleon](#) allows users to make collages and combine images in creative ways.

The software does not require precise selection of an object. It is especially helpful to those users who want to achieve a high-quality result without having to bother with layers and complicated selection techniques. The program adapts images in a *chameleon-like* manner so that they seamlessly blend into a composite image, creating a natural look and a reliable visual illusion.

The program works in five modes allowing users to achieve different effects: Montage Mode, Chameleon Mode, Blend Mode, Emersion Mode, and Double Exposure Mode.

[Version 11.0](#) offers new features and improvements that make the software even more efficient, enjoyable, and easy to use. The update includes new adjustment settings (Preprocessing and Post-Processing) for the source images and the resulting collage. Now users have full control over the appearance of images. The result will be even more vivid, expressive, and spectacular!

The recent version also includes one-click swapping of the images that allows you to quickly interchange the background and fragment images and gives more room for creativity. The Transform tool has been improved and gets new options for manipulating the object. Also, the update extends the list of supported RAW formats, offers some usability, compatibility, and stability improvements.

[Download AKVIS Chameleon 11.0](#) and try all features of the software during the 10-day trial period.

AKVIS Chameleon is available as a standalone application and as a plugin filter for compatible image editors: [AliveColors](#) by AKVIS, Adobe Photoshop, Corel PaintShop Pro, Affinity Photo, and other popular image processing programs. The software runs on Windows 7, 8, 8.1, 10 - 32/64-bit; Mac OS X 10.10-10.11 and macOS 10.12-10.15 - 64-bit.

AKVIS Chameleon, Home license, sells for \$54.00. The software is also available in Home Deluxe and Business licenses with advanced functionality and extended rights.

The update is free for users who bought the software in the last 12 months. Users, whose licenses are older and are not valid for the new version, can get Chameleon 11.0 for only \$14.95. For more details about the software, please visit [akvis.com](#).

AKVIS ([akvis.com](#)) specializes in the development of photo & video processing software. Since the company's launch in 2004, it has released a wide selection of successful products for Windows and Mac. The company always keeps up with the times and updates its products with cutting-edge technologies.
